

MAG Demo Ride 24th June 2012

The rides coincide with each of the 12 EU Parliamentary Constituencies in the UK.

This is why there are less start points than on 25th September 2011.

All rides leave their start point at 1pm prompt.

Thanks for being prepared to stand up for biking in the face of EU legislation that wishes to curtail our right to modify new bikes, even though no evidence exists to say modifications are unsafe or environmentally damaging. Imposing compulsory ABS and automatic headlights on will take the onus off bad drivers and onto us. On Board Diagnostics that record how the bike has been ridden and which will alienate the home mechanic.

Political negotiations continue and this demo is one part of that. Our Government supports us!

Closing the motorway will do huge damage to our cause.

The idea is to create a spectacle and let people see us, so blocking the roads will be self-defeating., to do this **we must keep left**, leaving the outside lane open and travel **no slower than 40mph** which is also important for emergency services.

Let's demonstrate that we are an organised lobby that commands respect. Please adhere to marshal requests.

Many rides have 'feeder' rides arranged to go to the start point. Some rides have dispersal points; some have finish points where you can park up and chat about the amazing event you have just been a part of!

We are not trying to 'beat' the turnout from last September, we are targeting the constituencies of MEPs who can vote in Europe and make a difference. But obviously, the more bikes the greater our impact, so please see details below for a start point near you.

To see the points on a map please go here: <http://tinyurl.com/MAG24JUNE12>

To buy T-shirts and download posters and information please go to :
<http://www.euhandsoffbiking.co.uk/>

There are 'event' pages for each run on the Facebook page - chat about meeting to ride to start points, read about feeder rides to the start points and click to say you are attending, invite friends...
